

SET OPERATOR - UNION

The UNION set operator is used to combine multiple subqueries and their outputs.

The UNION clause merges the outputs of two or more subqueries into one in such a way that the

Result set = Records only in query 1 + Records only in query 2 + A single set of records common to both query 1 and query 2 .

Example:

```
SELECT * FROM InfoTable } Query 1
WHERE age = 40
UNION
SELECT * FROM InfoTable } Query 2
WHERE age = 45;
```

SET OPERATOR - INTERSECT

The INTERSECT set operator is used to combine multiple subqueries and their outputs.

The INTERSECT clause merges the outputs of two or more subqueries into one in such a way that the

Result set = A single set of records common to both query 1 and query 2 .

Example:

```
SELECT * FROM InfoTable } Query 1
WHERE age = 40
INTERSECT
SELECT * FROM InfoTable } Query 2
WHERE age = 45;
```
